

**CANDIDATE STATEMENT
AUBURN CITY COUNCIL**

Name: ALICE DOWDIN CALVILLO

Age: 56

Occupation: Auburn City Councilmember

Education and Qualifications: It is an honor and a privilege to use my experience and passion to give back to Auburn as your City Councilmember. Enriching our quality of life, increasing public safety response, enhancing our local economy, ensuring fiscal stability and accountability, and providing adequate housing continue to be my top priorities and will keep Auburn safe and well-positioned for generations.

There are many pressures ahead for Auburn, including fiscal challenges, and my vast public sector experience, ability to craft effective solutions and develop beneficial relationships with our governmental partners and private stakeholders has demonstrated my effectiveness for Auburn.

I devoted my career to public service spending decades in State and local government in elected and senior appointed positions, including three terms as Mayor, and having served two former California Governors as well as the State Assembly, I have a demonstrated track record of effective leadership.

I am humbled to be supported by current and former Auburn Councilmembers and Mayors, our five Placer County Supervisors, and many diverse community leaders. I love my hometown and am committed to our community. I respectfully ask for your vote so that I may continue working hard for you.

**CANDIDATE STATEMENT
AUBURN CITY COUNCIL**

Name: RACHEL RADELL-HARRIS

Occupation: Mayor of Auburn

Education and Qualifications: Thank you for the privilege of serving our community as Mayor and City Councilmember. Auburn's unique character, rich history, and adventurous spirit drew me home when my husband and I began our family. It's been amazing to have the opportunity to give back to a community that has been so important to us.

I'm proud of what we have been able to accomplish over the past four years.

Our City Council has re-established community input and collaboration as our highest priority.

To build a stronger economic foundation, we have worked to diversify our sources of revenue and bring in new businesses.

We've increased employee satisfaction and decreased turnover by creating consistent staff expectations and improving working conditions.

To protect our natural resources, we have continued to reduce our carbon footprint, transitioning city facilities and vehicles to green power.

We updated systems to take advantage of modern technology. We can now provide better services for our residents and a more functional workplace for staff.

Though we have made progress, we still have great opportunities ahead. Let's plan thoughtfully, think long-term, and take advantage of technology to protect what's precious. I ask for your vote for re-election to help us stay on track.
