

**CANDIDATE STATEMENT  
FORESTHILL PUBLIC UTILITY DISTRICT**

**Name:** PETER KAPPELHOF

**Occupation:** Retired Construction Company Executive

**Education and Qualifications:** It has been my honor to serve as a Director of the Foresthill Public Utility District since May of 2023. I believe that my experience, skills and abilities uniquely qualify me to continue to serve the District's ratepayers.

I worked for a major construction company for thirty years, the last ten as its President, and nine serving on its Board of Directors. I have extensive experience in organizational leadership as well as significant experience in the construction of water treatment projects. I know what makes an organization work well to achieve its objectives.

Foresthill Public Utility District is a small water district with limited financial resources, but with all of the operational and regulatory requirements of districts many times our size. I understand that our responsibility as directors is to balance the demands of operating the District within the resources available.

I recognize that the District has a significant impact on the daily lives of each resident. I believe it is vital that the District and its ratepayers be in good relationship with one another.

If elected to continue serving as an FPUD Director, I will work to build and maintain an efficient, capable organization that serves the best interests of the ratepayers.

**CANDIDATE STATEMENT  
FORESTHILL PUBLIC UTILITY DISTRICT**

**Name:** JANE D STAHLER

**Occupation:** Retired

**Education and Qualifications:** It has been a privilege to have served the Foresthill community for four and half years.

As a past teacher I know the importance of being prepared. I have researched every issue brought before the FPUD board. I have and will always focus on understanding how each issue will effect the ratepayers.

The issues facing this community are extremely important. Budget issues determine if there is adequate funds to support the treatment and delivery of water to your homes. Replacing our aging pipes to prevent disruption of water to your homes or battle another wildfire is equally important. Deciding to sell your water in order to repair or replace needed Sugar Pine Dam instruments. Making the hard decisions that not everyone agrees on, but will benefit the majority of ratepayers. The issues are numerrus and board decisions impact all of us now and in the future.

Why do I want to continue to be the ratepayers FPUD board director?

Because my community has given me and my family a wonderful place to live. I simply want to give back.

I am asking for your trust and vote to continue serving our community.

Thank you for all your support over the past 4 years.
