

**CANDIDATE STATEMENT  
HEATHER GLEN COMMUNITY SERVICE DISTRICT**

**Name:** RHONDA JEAN RAJAOFERA **Age:** 68

**Occupation:** Real Estate Broker

**Education and Qualifications:** I've enjoyed serving as a board member for the last 4 years or so. Serving our water district to have a consistent, dependable source of water, protecting our water treatment plant, water tower as well as other assets is one of my top priorities. The sewer treatment pond as well as the system for waste in our community, road maintenance and fire suppression and preparedness efforts are the others. Although not part of the counties water districts duties, there are other concerns that come up within our community and I believe I make a great board member because I care deeply about our wonderful Heather Glen Community. I listen to the concerns of residents. I would treasure the opportunity to work with the other board members as well as residents to make great, financially responsible decisions that will improve our community in the coming years. I've been educated in business, finance and economics and I've been a real estate professional for 34 years. I've owned several businesses in my lifetime. I currently own and operate my own real estate brokerage since 2016. I have the time to invest in our community and would appreciate your vote.

**CANDIDATE STATEMENT  
HEATHER GLEN COMMUNITY SERVICE DISTRICT**

**Name:** MAX BAILEY **Age:** 85

**Occupation:** Retired/Volunteer

**Education and Qualifications:** I have had the honor of being a member of the Board of Directors of the Heather Glen Community Services District for over twenty years, and have been President for many years. Being a board member is a big responsibility that I take seriously, working countless hours and making sacrifices to be the best possible steward of a water district and to help shape a community. I have had years of regular interaction with and direct supervision over the contractor in charge of the water treatment plant and the contractor who manages the wastewater settling pond. I have built strong relationships with many people who staff PCWA and State level water governing boards. I know the history of the District and the history of the community.

I work closely with the general manager concerning the business of the District.

I developed our Welcome package of information for new owners. It includes all governing documents and a list of who to call when you have questions, or need help.

I would like to continue my tenure in Heather Glen leadership as my heart is in the community. I thank you in advance for you support and for your vote on November 5th!
