

<p style="text-align: center;">CANDIDATE STATEMENT NEVADA IRRIGATION DISTRICT, DIVISION 3</p> <p>Name: BRAD FOWLER Age: 47</p> <p>Occupation: Rancher, Business Owner</p> <p>Education and Qualifications: I am a U.S. Army Veteran, husband, and father of five daughters. I am a lifelong, generational, stakeholder and resident of the Nevada Irrigation District. I am running for the NID Board because I believe water should be affordable and reliable.</p> <p>I've been actively engaged with NID for over 15 years, attending board meetings and community workshops. I'm a rancher, irrigator, business owner, and water customer with a long-term interest in the health of the agency.</p> <p>Storage: My goal is to secure abundant water availability for the future. Storage is my top priority: our grandchildren will thank us for our efforts to store water. During the winter months, we could retain excess water that otherwise is going to the ocean.</p> <p>Affordability: We must continue to pursue efficiency and additional revenue streams to keep water rates affordable.</p> <p>Reliability: Everyone is reliant on water and we need to have a water supply that is not tied to other agencies. We should steward our water responsibly without depending on others.</p>	<p style="text-align: center;">CANDIDATE STATEMENT NEVADA IRRIGATION DISTRICT, DIVISION 3</p> <p>Name: KAREN HULL</p> <p>Occupation: NID Director/Farmer</p> <p>Education and Qualifications: The affordability and reliability of our future water supply is at risk. As we face serious challenges ahead, the need for fiscal responsibility and strategic leadership has never been more crucial.</p> <p>In my first term as your representative on the NID Board, I delivered on my promises. NID overhauled its financial operations, developed infrastructure plans, and grew income without raising rates for three years.</p> <p>We avoided a catastrophe this summer when PG&E infrastructure failures cut off water to our district. By holding their executives accountable and managing water wisely, we made it through.</p> <p>Today, our infrastructure is aging, much of it dating back 50 plus years. We need to ensure adequate water storage given changing weather patterns. And NID is facing outrageous demands from the state water board that threaten our water rights.</p> <p>As a former executive leader at UC Davis, I have what it takes to tackle these difficult issues. As we work toward a resilient future, I am committed to making strategic investments in our aging infrastructure and ensuring adequate water storage while also keeping water affordable. And I will fiercely defend our water rights against state overreach.</p> <p>For a secure water future, please support my re-election. www.KarenHull4NID.com</p>
<p style="text-align: center;">DECLARACIÓN DEL CANDIDATO DISTRITO DE IRRIGACIÓN DE NEVADA, DIVISIÓN 3</p> <p>Nombre: KAREN HULL</p> <p>Ocupación: Directora del Distrito de Irrigación de Nevada (Nevada Irrigation District, NID)/Agricultora</p> <p>Educación y Calificaciones: La asequibilidad y confiabilidad de nuestro futuro suministro de agua están en riesgo. Ante los graves desafíos que nos aguardan, nunca ha sido más crucial la necesidad de responsabilidad fiscal y liderazgo estratégico.</p> <p>En mi primer mandato como su representante en la Junta del NID, cumplí mis promesas. El NID revisó sus operaciones financieras, desarrolló planes de infraestructura, y aumentó sus ingresos sin aumentar las tarifas durante tres años.</p> <p>Evitamos una catástrofe este verano cuando fallas en la infraestructura de PG&E cortaron el suministro de agua a nuestro distrito. Al exigir responsabilidades a nuestros ejecutivos y gestionar el agua de manera inteligente, logramos salir adelante.</p> <p>Hoy en día, nuestra infraestructura está obsoleta y gran parte de ella data de hace más de 50 años. Necesitamos garantizar un almacenamiento adecuado de agua dados los patrones climáticos cambiantes. Y el NID se enfrenta a demandas indignantes de la junta estatal de agua que amenazan nuestros derechos sobre el agua.</p> <p>Como exlíder ejecutiva de la Universidad de California (University of California, UC) en Davis, tengo lo necesario para abordar estos temas difíciles. Mientras trabajamos hacia un futuro resiliente, me comprometo a realizar inversiones estratégicas en nuestra infraestructura obsoleta y a garantizar un almacenamiento de agua adecuado, a la vez que mantenemos el agua a un precio asequible. Y defenderé ferozmente nuestros derechos sobre el agua de los excesos del estado.</p> <p>Para un futuro de agua seguro, por favor apoye mi reelección. www.KarenHull4NID.com</p>
